## ARE YOUR PETS UP TO DATE WITH THEIR ANNUAL VACCINATIONS?

Cats, Dogs and Rabbits yearly vaccinations are vital to keeping pets protected from a range of highly infectious diseases. Cats and dogs may also need to be up to date in order to stay in kennels or a cattery.

**Our dog vaccines help protect pooches from the highly fatal parvovirus, canine distemper, adenovirus type 2 (and hepatitis), parainfluenza, leptospirosis and the highly contagious kennel cough.**

**Cat vaccines can protect kitties from viral rhinotracheitis caused by feline herpesvirus-1, feline respiratory disease caused by feline calicivirus, feline panleukopenia caused by panleukopenia virus.**

**Rabbit vaccines will help keep bunnies safe from calicivirus.**
